Did ancient astronauts who came to Earth thousands of years ago genetically engineer us humans from an already existing primate species ?

Well, there have been many researchers who believe so and we now have historical and scientific evidence to prove this to be a fact, however less known among social circles as we are mostly conditioned to believe in certain creation myths and stories propagated through our educational system and religions.

Science is not a method for exploring the truth. Science is an extension of our reality map. So far, our reality map (based on science for the past 300 years) described by sciences is entrenched in an obsolete mode. It is entrenched in the superstition of materialism. It looks at the human body as a physical machine that has learned how to think, if you believe in Communism. Capitalism, feelings, drives, God, Heaven, salvation or anything else, it is because of the dance of molecules.

• **Pleiadians, who are our "genetic" parents. One of 22 star being races involved with our creation.**

They too are present physically on the planet and walk the streets next to humans. Humans are essentially the product of Pleiadian DNA. We are not native to the Earth, nor are humans in perfect harmony with the planet, because we are projecting our consciousness into a bodily form that, in essence, is not "born of Earth". It is

close, but not physically, energetically or geometrically perfect within the context of the Earth experience.

As was said, there are many Pleiadians living and working amongst humans. Some of them are fully conscious of who they are. Some have chosen to come in through a womb experience just as humans have.

As with humans, many of them are "asleep", "just waking up", or "fully conscious", if Pleiadians are examined in terms of their "aura", they appear to have none at all. They actually do have one.

Aura fields are a function of the electrical nature of the cell. Their aura is vibrating at a slightly higher rate that is typically beyond human sensitive perceptibility. Ironically, humans will see the least of these two groups toward the close of the cycle, because they are honoring the principle of non-intervention.

They are trying to allow us to have our experience by ourselves 8 and not blatantly interfering with the human process.

Note: For every species of animal or insect on Earth there is a humanoid 5 point-star pattern type analog out in the universe. "As above, so below."

As mentioned in the Flower of Life treatise, the area near the Giza plateau is the primary anchor point for all the grids within conscious awareness that most humans on the Earth are in resonance with.

The consciousness grids primarily focus on "cubic" information systems; humans tend to have thought patterns which lead to straight lines and sharp angles - not spherical shapes and curves, although there are many examples of the influence of non-linear grid systems around. The resonance of our bodies to those grids determines how we perceive our reality and how "belief systems" are perpetuated. The largest pyramid on the Giza plateau was there before the Egyptians even arrived, and predates the Ice Age (as does the Sphinx).

The outer layer is composed of a microcrystalline limestone. Geologists investigated the source of this limestone between 1986 and 1988 during the process of trying to figure out how the Great Pyramid was built; they took core sample of the limestone, thinking that if it was naturally occurring limestone they would find stratification in the core samples, as well as tiny marine fossils. They found no strata, no fossil material and that the limestone was homogeneous all the way through with no variation. It was not naturally occurring limestone; it is an artificial stone that was poured in place. Ancient texts describe this material as being called "Everlast", and describe it as being designed to last through the end of the 200,000 years cycle.

This artificial calcium carbonate limestone is chemically the same as human bone. This means that the atomic bonding structures are equal, and there is a resonance with human bone.

- **Verdants**

Expanding empire. Huge issue.

http://www.bibliotecapleyades.net/vida_alien/vidaalien_signtimes10.htm#Our%20Pending%20Merger%20with%20Andromeda

In view of the Verdant case, we need to add a Type IV to Kardashev's categories. 1-3 Type IV would be the larger, cosmic commonality, the generic "civilization" of which aliens speak.

Type IV civilization would utilize negative energy and alternate cycle phenomena in order to reach back, and through all intelligent life forms to preserve the peace and secure the most enduring inter-alien ecology.

Type IV civilization would be able to exceed technology and begin to inter-dimension within the very nature of the phenomena surrounding us.

Humility and forbearance would be required to achieve a solution.

Finally, a Type V population would be a population that is so advanced that it is (or was) able to hyper-dimension from a previous universe cycle into the current version using alternative cycle dynamics that can be effected in faster-than-light ways.

Type V populations would resemble advanced Type IV populations in ways but would be of longer duration and would have a deeper awareness of the larger continuum.

Some could be so advanced that they inter-dimension with aliens originating among a succession of previous universe cycles.

Nonetheless, a kind of mortality and a larger, alternate-cycle conservation would be explicit therein.

Inter-dimensioning of the sort would require a sensitivity to collective considerations of various sorts. Why? Because for any population, regardless of their duration and technological level, there are limitations.

IFSP (Intergalactic Federation of Sovereign Planets)

Verdant empire:

Extra-dimensional physics: USAP study

Type 3 galaxy negative energy misuse

In short, the Verdants may be our first clear example of a population that intrudes on other galaxies for energy/resource purposes and intimidates populations who might criticize the way that Verdants speed the energy clock on other galaxies due to Bearden's Δt effect surrounding the use of electrogravity.

There's abundant evidence that Verdants try to stifle criticism of Verdant activities. I've personally witnessed this many times, but there is an ironic twist in such doings.

They normally exist in the 4th density reality, a higher vibration,

which makes them invisible to those in the 3rd density reality which is the one we live in, like the blades of a fan disappearing when it is turned on. However highly intuitive individuals can sense both their presence and pick up their thoughts. All aliens can move down into the 3rd density at their discretion, and their space ships can also become visible in the same manner.

Non sexual Verdant

Among alien populations, the sexual vs. non-sexual distinction is considered so important, so intrinsic to sorting out complex issues, that a basic non-sexual perspective appears to be the universal standard. Why is that? Because a non-sexual lifestyle is more internally consistent, more cool-headed and ecological. Non-sexual reasoning is less slippery, less prone to pleasure-seeking pitfalls and specious rationalizations, less distorted by the need to impress others.

Non-sexuals can sustain their thinking more prolonged and can develop finer, more detailed kinds of reasoning.

Among alien societies, genetic engineering is standard fare, for obvious reasons. It results in longer lives, higher intelligence and the ability to withstand high-energy fields during faster-than-light electro-gravity travel. Factions of the US black budget structure know this, of course.

• Remote Viewing:

There are subtle ironies, of course. As Russell Targ says, “The big secret is that there are no secrets.” Aliens know this and further suggest that this simple, basic fact helps to keep the entire universe honest (with some limited exceptions). It allows for an ever-ready check on the schemes and intentions of any offender. Aliens’ explanations and methods for remote sensing are slightly different than the human version. So, those humans who try to tell you that remote sensing capacities are “a threat to human security” may have questionable motives for doing so. Remember, they aren’t worried about remote viewers like you lifting their weapons designs, which largely remain indecipherable.

The truth is, there are two basic groups who most fear the use of remote sensing to “see” through walls and over large distances.

First, the most thoroughly corrupt, repeat offenders among us fear that remote sensing will expose their crimes. It will turn up the heat and betray them.

And, secondly, remote sensing allows humans to greatly advance their awareness of aliens. So, the (minority) alien contingent that abducts humans in order to hijack control of the human agenda fears remote sensing because it will expose their crimes, too.

Finally, above all else, we should remember that there is already a huge and highly refined cosmic (and earthly) community practicing remote sensing skills, at present.

Entry into any such awareness involves a basic ecology of non-violent, non-invasive considerations. Think in terms of a library or a museum, for example, where peoples of all kinds mix without incident—every single day. It's a given that we can do so, if we simply remember not to violate others in the process.

- **Neil Freer:** I have taught on the college level, Philosophy and History of Religion, but I have tended to dissociate myself from the academic world, the world of the "expert", because of the control by funding so rampant in that community and the **fear of peer pressure to conform to the "expert" consensus paradigm.**

These are the driving factors that prove out, over and over again, the thesis of Tom Kuhn in his "The Structure of Scientific Revolutions": radical new paradigms are fought, kicking and screaming, regardless of how robust and clear the evidence is, and only accepted when the old guard dies off.

A second reason is that the more intelligent of them realize well that his thesis calls into question not only their data but a fundamental assumption on which their disciplines are founded. They accept as unquestioned that the transcultural "gods" known to all the ancient civilizations were unreal, mythic beings.

Bob Dean said that was a fact mentioned in the NATO report - that some of the aliens were so much like us that we couldn't tell and they could be in the halls of the Pentagon - that totally freaked the generals and the officials privy to the reports.

How do we deal with this heavy culture shock? Zecharia Sitchin, Annunaki.

• **Monatomic gold:**

Ancient gold processing on Sinai peninsula, at Mt. Serabit

It is because of the limitations placed on the conventional testing sequence that five per cent by dry weight of our brain tissue is said to be carbon, whereas more rigorous analysis reveals it as the platinum metals iridium and rhodium in the high-spin state. The King's Chamber was, in fact, contrived as a superconductor, capable of transporting the Pharaoh into another dimension of space-time. And it was here that the Pharaoh's Rite of Passage was administered in accordance with the Book of the Dead.

The key to this Rite of Passage is defined by a single conical inscription near the entrance to the Chamber. This hieroglyphic symbol - the only verifiable hieroglyph on the whole of the Gizeh Plateau, and the very same as appeared many times at the Sinai mountain temple - reads, quite simply, 'Bread'.

In the context of this talk, we have stepped beyond the bounds of the Bible to witness the alchemical and scientific process which facilitated the genesis of the Grail Kings. This line of succession from Cain, through Egypt to King David and onward to Jesus, was purpose-bred to be the earthly Purveyors of the Light. They were the true Sons of the

Gods, who were fed firstly on Anunnaki Star Fire from about 3800 BC and, subsequently, on 'high-spin' metal supplements from about 2000 BC. In short, they were bred to be leaders of humankind, and they were both mentally and physically maintained in the 'highward' state: the ultimate dimension of the missing 44 per cent - the dimension of the Orbit of Light, or the Plane of Sharon. Only during the past 150 years or so, and more specifically during the past 80 years, have the great storehouses of Egyptian, Mesopotamian, Syrian and Canaanite record been unearthed from beneath the desert sands. First-hand documentary evidence from before Bible times has now emerged on stone, clay, parchment and papyrus, and these many tens of thousands of documents bear witness to a far more exciting history than we were ever told.

• **USN Capt. Mark Richards:**

This drawing is from 1997.

Before we examine these ten exotic aerospace craft, a brief overview of the different forms of generating antigravity fields is in order.

The most primitive antigravity technology is **electrogravitic**. This involves using voltages in the millions of volts to disrupt the ambient gravitational field. This results in an 89% reduction in gravity's hold on airframes in such vehicles as the B-2 Stealth Bomber and the TR3-B Astra triangular craft. And given the considerable ambient

Sikorsky's New S-97 Raider Helicopter

From the [DefenseTech](#) website

Lockheed Martin Corp.'s Sikorsky unit has released a new video of its next-generation helicopter prototype, the S-97 Raider, undergoing more flight testing.

ionization field I observed around the X-22A, it is reasonable to assume that extreme-voltage electrogravitics is also employed with these craft.

The next level up of sophistication is magnetogravitic. This involves generating high-energy toroidal fields spun at incredible rpm's, which also disrupts the ambient gravitational field, indeed to the extent that a counterforce to Earth's gravitational pull is generated.

The early British aeronautical engineers called this dynamic counterbary. This may have been used in some earlier American saucers and prototypes, but I have only been told that the secret Nautilus spacefaring craft uses magnetic pulsing , which appears to utilize this technology.

The third level of sophistication, that used in the more modern American antigravity craft, is direct generation and harnessing of the gravitational strong force. Such a strong-force field extends slightly beyond the atomic nucleus of Element 115, an exotic element donated by Star Visitor scientist-consultants to human scientists at S-4, a secret base south of Area 51. By amplifying that exposed gravitational strong force, and using antimatter reactor high energy, and then directing it, it is possible to lift a craft from the Earth and then change directions by vectoring the shaped antigravity force field thus generated. Important information about this third technology is available on Bob Lazar's website. (1) This information is also described on the Bob Lazar video. Lazar worked on extraterrestrial technology at Los Alamos National Laboratory, and Area 51's Site S-4.

Another informant, 'Z', aka 'Jesse', who formerly worked at the NSA, told me that the Lockheed X-22A antigravity fighter disc fleet is equipped with Neutral Particle Beam directed-energy weapons, that it is capable of effecting optical as well as radar invisibility, and that it is deployable for worldwide military operations from the new U.S. Space Warfare Headquarters, located in hardened underground facilities beneath 13,528' King's Peak in the Wasatch Mountains' High Uintas Primitive (Wilderness) Area, 80 miles east of Salt Lake

City

Quite possibly it was the Lockheed X-22A two-man discoid craft, the real DarkStar, of which the unmanned drone X-22 DarkStar is but an aircraft 'cover' program to disguise the existence of this manned antigravity fighter disc, the X-22A.

Further, as 'Z' noted, the real manned discs come equipped with the latest Neutral Particle Beam weapons, which take apart the target at the molecular level. Star Visitor craft do not incinerate humans. Only human military fighters are so deployed.

The TAW-50 has speed capabilities well in excess of Mach 50, a number the contractor calls 'a very conservative estimate'. Its actual speed is classified.

Since Mach-1 is 1,225 kilometers per hour, (approximately 748 mph), this means that the TAW-50 is capable of moving considerably faster than 38,000 mph. In comparison, the velocity required to escape Earth's gravity is 25,000 mph. Therefore the TAW-50 is capable of going into space, and does.

The TAW-50 has a SCRAM (supersonic ramjet) propulsion system for passing through the outer atmosphere. The TAW-50 utilizes electrogravitics to maintain its own artificial gravity while in weightless space, as well as to nullify the vehicle's mass during operations. The TAW-50's power supply is provided by a small nuclear power generator that the contractor said is Normal-Inert.

The contractor said that the space plane uses electromagnetoferrrometric power generation by the immersion of pellets in heavy water (deuterium) and specially-designed coil

superconductive magnets, which yield enormous amounts of free electrons when placed in an immersion which has been triggered into an oscillating field-state flux.

The TAW-50 has a crew of four. Nevertheless, the TAW-50 flies so fast that it requires computers to fly it. These were developed by American Computer Company, who derived them from its Valkyrie XB/9000 AI [artificial intelligence] Guidance series. They utilize a RISC Milspec Superchip. There are 180 of them in the flight control system, and 64 more in the weapons guidance system, the contractor reported.

The TAW's Kill Laser is much smaller than the earlier 1980s-era SDI (Star Wars program) models, and has a miniaturized cooling core and 500 times the wattage. The contractor said it uses a spontaneous nucleonic burst to trigger the lasing [laser] effect.

In addition, the TAW-50 is armed with microsuperexplosive HyperDart missiles. These are just a little larger than ordinary aircraft cannon ammunition, but travel at hypersonic speed for up to three minutes, and have enormous explosive capability. One HyperDart can blow apart a MiG fighter anywhere within 20 feet of the HyperDart. The TAW-50 carries several hundred HyperDarts.

Because the TAW-50 is designed to operate in space, it has on board a two-day air supply. This air supply can be extended by using its scoop system and traveling into the upper atmosphere to harvest more oxygen.

The contractor did not reveal the size of the space fighter-bomber except to say, 'It's a pretty big thing.'

The performance of the TAW-50 makes it virtually impossible to defend against. It can hide in orbit many hundreds of miles into space, orbiting at times at 22,000 mph. Then, without warning, it can dive straight down through the atmosphere at over 38,000 miles per hour on an 80-degree attack vector, reverse direction within 150 feet of the ground with very little loss of motion and without a glide turn, and almost instantly go vertically straight up at over 38,000 mph until long after it leaves the atmosphere and resumes orbiting in space.

The contractor noted, 'Those [electro-] gravitics allow it to change its mass to almost nothing in a moment, and reverse direction in a second, increase its acceleration to so many times G [Earth's gravity] it's not funny, yet they are able to nearly nullify the G-force on the pilots.'

They [the electrogravitics] are fourth-generation, with the ability to bring it to a complete standstill in under 2 milliseconds, if need be, without crushing the pilots, and keep it there for quite some time.' The contractor notes, 'It's far too fast for tracking radars.' 'And,' he adds, 'what military aims its radars straight up?'

The TAW-50 can be refueled and rearmed in orbit by docking with the secret undeclared Military Space Station that is in orbit (12) The entire refueling and rearming procedure takes under 10 minutes. Who mans the gas pumps? Military astronauts trained at the Secret Air Force Academy, located in the hills immediately west of the official Air Force Academy at Colorado Springs, CO.

These military astronauts rotate duty by traveling to and from Vandenberg Air Force Base on other military antigravity vehicles.

The Cape Canaveral Space Shuttles have carried the arming platforms ('classified Defense Department payloads') up to the secret Military Space Station. The contractor reported that with a few extra tanks of LOX (liquid oxygen), the TAW-50 could fly to

the Moon and back.

As of 2002, the U.S. has 20 TAW-50s in its arsenal. But, as the contractor commented, 'You could take out an entire nation in under 10 days with only 10 of these, doing three attacks a day.

One can wipe out an entire city the size of suburban Cleveland in a single attack without having to use any nukes at all.'

The electrogravitics for the TAW-50 was produced by GE Radionics.

Pratt & Whitney designed the SCRAM atmospheric penetrator technology.

American Computer Company created the artificial-intelligence supercomputers.

- **Hyperdimensional AI system:**

<http://projectcamelotportal.com/2014/10/30/jake-simpson-the-biggest-secret-report-2/>

The AI surveillance system, Jake told us, was literally "out of this world". It operates hyperdimensionally, based on a highly advanced quantum computing model that is basically our development based on acquired **alien technology**. **This system is so advanced that the ETs themselves are unhappy that we have it.**

Not only does it enable access to what any given person is saying, or even thinking – if targeted for investigation – it can also transcend time itself and thereby access information about the thoughts and words of historical figures.

Jake's information is that it had never been certain that the catastrophe had been averted, and he confirmed that the governments of many first-world nations were continuing to make their detailed and extensive preparations. Australia, we were told, was the "Ark of the World", and had been designated as such many years previously.

Jake confirmed that he had personally seen some of the classified maps showing dramatically altered future coastlines, and also confirmed the possibility of a very advanced high-speed 'shuttle-like' system that connected many places, like the US and Australia under the Pacific Ocean – a longstanding but always uncorroborated rumor within the UFO community that had acquired semi-mythological status since the startling reports of John Lear and William Cooper in the late 1980s.

This has all happened before

One of the most startling snippets of information Jake revealed was that in some locations the base construction engineers had broken through into much older facilities that had been there for thousands of years prior – apparently built for an identical defensive purpose. All this, Jake had told us, had happened before: the catastrophic events are cyclic.

Because of what had been learned through breaking into older facilities built by a prior Earth culture, in some locations decisions had been made to increase the depth of the new facilities to as much as 30,000 feet [9000 meters].

The great classified libraries of the world, in the Vatican and elsewhere, all contained detailed accounts of the destruction of prior civilizations. The Flood Myth, as many anthropologists have described, is evident in many dozens of different cultures all over the world.

• Henry Deacon interview:

<http://projectcamelotportal.com/2013/02/17/henry-deacon-aka-arthur-neumann-all-interviews-3/>

"The situation with time loops is that there are a large number of parallel timelines, lots of branches. There are no paradoxes. [draws a diagram] If you go back in time and kill your grandfather, that's the grandfather paradox everyone talks about, there's no paradox. When you go back and change the past, it creates a different timeline, which is a new branch of the original one. On that timeline, you'd not be born and wouldn't exist, so that aspect of the paradox is true. Do you see? But on this timeline, which you're on here and now, you do exist, and continue to do so. There's no paradox. It's simple... do you see? You're dealing with different branches of a kind of time tree. No principles get violated. All future events are possibilities, not certainties. That's kind of pretty important, an important... distinction. That's really all I can say about that."

In our first interview, Henry told us he had never heard of Dan Burisch. Because parts of Henry's story seemed to overlap with Dan's, we strongly urged him to view our three part Dan Burisch video interview. On 27 September, three weeks later, we received the following e-mail. It's quoted verbatim and in its entirety.

Dan Burisch is telling the whole truth. I confirm this. timelines and allbest wishes
This was of extreme importance, and we checked this with Henry in person as soon as we could. It appears that Dan's claims – as extraordinary and incredible as they may seem – are true. Henry did not comment on J-Rod, the treaties, or Lotus, as he has no experience or knowledge of those. But he did confirm that the greatest secret in the classified world – about which many insiders themselves have not been briefed – is that there is a complex problem concerning alternative timelines, that some of the visitors are indeed humans from the distant future, and that there are significant issues with a possible future event which may seriously affect the earth and its population. The last of these is the reason that all this has been kept so highly classified, and why disclosure is so problematic.

Roswell

The Roswell visitors were future humans – as Dan Burisch has stated. They were not from another planet, but from a future Earth – stepping (which is a better word than “traveling”) back in time to 1947 to attempt to deal with the problems which had occurred in their history. German advisors were with them.

Apparently, Dan was also correct in that the Roswell visitors were from earlier in the future than some other visitors who arrived subsequently. But Henry didn't give details or time frames. The Roswell visitors were on a purely altruistic mission. They did not have to do this, but chose to... out of compassion. But the mission went disastrously wrong – not just because they crashed (an accident caused by high-powered radar – later the military realized this and adapted the radar as a weapon), but because they had a device with them which was their only means, as an orientation device in time and space, to get them home and back to their own time. The device was a little box, far smaller than the “Looking Glass” that Dan Burisch and Bill Hamilton describe as being subsequently utilized by military scientists in various experiments. When the box was acquired and investigated by the military, this became a catastrophe in itself. It made the timeline problem many times worse, because this both introduced the time-portal technology to us at the wrong time... and also told the military what lay ahead. Henry could not stress too strongly how totally calamitous for us all the Roswell incident was. It was a major, major setback, right at the start of the future humans' project to help fix the problem. Since then, there have been continued attempts by the future humans to remedy the exacerbated situation. This is what has caused an overlay of timelines, creating a tangled complexity which apparently is challenging for even the most brilliant present-day minds to understand fully. We asked Henry why the disks kept on crashing, almost year after year. He said that it seemed strange that the visitors had not evaluated the risk from radar before they returned in time, but he explained it was just very dangerous for them to be here for a variety of reasons, despite their advanced technology. Crashes have been

caused by many factors, including offensive action. Importantly, Henry emphasized that the Roswell visitors were not the Grays.

The Secret Space Program: for our benefit, or that of others?

Maybe most importantly, Henry held the strong opinion that what has become frequently referred to as 'the secret space program' is well-intentioned (at least one of the programs) and is being managed by a group with the purpose of ensuring that the human race will survive, come what may.

For that reason, Henry was extremely reluctant to do or say anything to jeopardize its continuation. He urged us to support his stance.

In answer to our many questions, he explained that a classified, alternative space program, not in any way connected with the use of rocket motors, began soon after World War II and that other agendas - such as to radically reduce the world's population, and keep the remnants under tightly corralled control - were being pursued by entirely different and separate groups.

He emphasized that there was **extreme diversity and compartmentalization** among behind-the-scenes governing groups on Earth (just as among the alien visitors), had not seen any evidence that one single group was in overall control, and that their differing plans and agendas for the human race were not in any kind of strong alignment.

Most interestingly, he told us that the Department of Homeland Security (apparently the name bears little relation to its function) had been established partially as a coordinating organization for at least some of these groups (many of them intel) after other attempts to facilitate the groups working together to share project information had failed. Henry had been part of some of those attempts, which is one reason why he is so unusually well-

informed in diverse areas (compartmentalized for many people) where much information is not shared at all.

This extreme compartmentalization seems to explain the confusion about how it was that the controllers, whoever they are, appear on the one hand intent on exterminating or controlling huge numbers of people... while on the other hand are actively reaching for the stars. Henry again stressed the very high level of complexity, urged us to take our attention off intriguing issues such as Mars, exotic technology and alien visitation, and focus instead on immediate threats to our survival, freedom and reorganization closer to your home. We acknowledge his wish and hope that we have represented him fairly and accurately.

Free energy was not released to the public sector because it would have only exacerbated population growth. Maybe. Maybe not.

• On Waking Up to our new reality:

With the information explosion drastically influencing so many lives there appear to be many strata of awakening levels arising. Once people start connecting the dots of now available facts and formerly unavailable research, whole new paradigms through which to perceive our changing reality emerge. What we do with this new information, and how far we keep pursuing deeper and deeper levels of perception, determines our outlook at any given time.

This is why constant change and continual learning are integral to progressing toward a full on awakening.

As we continue to evolve in perception we begin to see that underlying this deluge of surface information there are amazing consistent truths to grasp and implement that will truly transform not only ourselves, but the world around us.

We Are Our Perception

Even quantum physics has confirmed what the sages have taught through the ages.

What we perceive and apply our intention to determines our individual reality. That we are in fact fully in charge of how we perceive the world around us is the underlying truth that is being masked from humanity.

Completely contrary to the deterministic model we've been taught, our very being is not the result of set factors we can do very little about, but the exact opposite. We literally are a projection of our own consciousness. The rest is up to us as to how much we let the illusory projection laid before us determine our reality. When we grow to more fully grasp the enormity of the significance of that fact things really start to kick into gear. This will not be taught nor even implied by matrix scientism, the educational and media web of lies, nor blinding, binding religious dogma.

But once this truth is discovered, in fact experienced as it must be, the majesty of existence opens up to such glorious vistas of empowerment and possibility the very grip of any and all external influences and limiting mind conceptions falls away as if it never existed in the first place. Because it essentially didn't.

It was only real from a deliberately manipulated limited perception that created a feedback loop of illusion, giving the appearance that there were no other possibilities outside that manufactured realm.

Information is a Tool, Not an Answer

Knowing what's really going on around us is just the beginning.

Realizing that in fact this is an imposed psycho-spiritual prison built on deliberate deceit is simply the gateway. We don't need to spend the rest of our lives describing how they do what they do and how bad it is in an almost neurotically hysterical state. That's simply another level of containment if we don't keep on progressing towards a full awakening way beyond the confines and influences of their entrapping infectious system.

It's surpassing those first orbits as we clear the pull of the dense gravitational nucleus we're born into that things really start to get interesting. And extremely empowering.

We cannot begin to know the deep, essential solutions our souls long for by operating within the externally imposed density as we'll only reinforce the strength of the spider's web by our futile struggling. The spider is much wiser than we when we operate within its parameters. We have to first safely transcend and then operate from a clearly distanced perspective.

Until Then... Don't Be Intimidated or Enthralled by Shadowland

The beautiful so-called secret key to conscious awakening is that you'll know it when you've found it.

If you're still not sure, you're not there yet. No worries, that's the path we all have to take. Seek in sincerity and you will find. Until then all is grist to mill. We gain strength, wisdom, determination and shed the mechanisms that have held us back as they are revealed to us. It's all part of the process. And definitely, at whatever stage of our awakening, we need to keep exposing the trickery and deceit to help others along the way and out of the net, but we mustn't dwell there or let it get under our skin, even in our sacred anger and outrage.

There's a time for everything, but if we're going to realize the true solutions for our planet and its inhabitants we need to first get to where we know from whence we are operating, with a crystal clear vision of what needs to be done from a firm foundation in loving truth. Even more so, we need to rediscover and realize the true spiritual power tools at our disposal.

As we do, and is already happening, our weaponry of truth outmatches their foolish artificial 3-D hardware to such an extent they will be exposed to be the imposters they are - nothing but dark shadows trying to usurp the sun.

Absolute futility, and not a game worth getting caught up in. It's only our lower levels of perception that give their illusion any form of reality.

Once we transcend and live in the realization of who we truly are this lower level projection we can call shadowland has nowhere to cast its illusion... and it is gone.

Indescribable Truth

The truth is indescribable in mental terms.

This is why we are so awed by the ideas of nature, fractals, sacred geometry and this magnificent physical design as the handiwork of something we know is much more spectacular that lies behind it. Left brained science, even when it's well meaning, cannot begin to fathom this richness as it seeks to contain this living energy in a form of mental and even scientific egoic dominance.

As hard as they try to crack the code with these motives they'll never do it. They may make a mess in the process, which they are, but trying to understand from that limited mind set is like trying to empty the ocean with a spoon. It's a complete exercise in futility all based on the reinforcement of self. Unless there's some tangible, "provable" answer, some substantive, explainable, logical something they can see, taste, touch, smell and feel they won't accept it. Again the self-reinforcing feedback loop that will never be broken. To find real truth you have to find it and experience it for yourself, one hungry heart at a time.

When you want it bad enough you'll find it, or at least the next clue to keep you on your way towards greater truth. Sure there are many types and levels of truth, but the ultimate truth is fundamentally an ongoing interactive experience with our interconnected consciously aware universe within which we are all magnificently woven.

It's that same creative source we can only barely sense at times, but that we see in the magnificent world around us and the fertile imagination of our sentient hearts and intuitive souls.

Truth Can Only Point the Way - Ours Is to Pursue

These are just hints at what lies beneath these layers of illusion, the lowest of which is this synthetic matrix of deceit that has been deliberately laid to ensnare the hearts of humanity. Even the physical world is an almost crude five sense manifestation of the intricate workings of creation but what a joy to experience! To realize these are barely fleeting glimpses of much more amazing realities is beyond belief... and that's good, belief is a limiting containment system.

Experience is what we're shooting for. Just don't give up. There are plenty of pitfalls on the way as that's what this learning and growing experience is all about, so get used to it. Just learn from it and keep on. There are many levels of awakening but each one is more amazing than the last.

What should propel us though is not just the path of wondrous personal discovery, although that's a big part of it, but to access the resources we need to further dissolve the snare laid for those still unaware of their plight within this lower world of control and deceit. There's no greater driving force than the unstoppable power of empathic compassion.

We share the pain of all those still trapped and blinded by the the great deception, and by our very connectivity we are love-bound to awaken to our most empowered state possible to help bring about the transformation we are all longing for.

"Out From The Deep"
Enigma

*We came out from the deep
To learn to love, to learn how to live
We came out from the deep
To avoid the mistake we made
That's why we are here !
We came out from the deep
To help and understand, but not to kill
It takes many lives till we succeed
To clear the debts of many hundreds years
That's why we are here !*

The universe is a big, complex place. But it need not be overly difficult to understand. Its comprehension is aided by first utilizing a few simple principles and concepts. This task recalls the ancient Sufi saying, "knowledge is a single point, but the foolish have multiplied it!"

CORE PRINCIPLES OF THE NEW COSMOLOGY

Linear, relative reality and non-local, non-linear reality both simultaneously exist as Reality. Their perception and understanding is wholly dependent on the level of consciousness of the observer. Even physical matter has an aspect of its nature which is non-local, transcendent and conscious.

Conscious, intelligent biological life forms, whether on earth or from some other planet, have physical realities as well as spiritual realities. Pure mind, or unbounded

consciousness, is innate to all such life forms. It is the ultimate highest common denominator which all life shares.

Beings which do not have biological bodies (so-called astral or spirit beings) are also conscious, intelligent entities, and as such can interact with other conscious life forms, both biological and otherwise. On rare occasions they can even effect a physical manifestation. Once again, the highest common denominator linking these beings with other life forms is unbounded consciousness, or non-local mind.

The universe consists of both linear and non-linear, or transcendent, aspects which, while seeming paradoxical, simultaneously exist at every point in time/space and non-time/space. From this standpoint, every point in time and space exists in every other point in time and space, through the quality of non-locality.

The concept of God, or of a Universal, All-Knowing Being, is enhanced and magnified, not diminished, by the recognition of the vast multiplicity, infinite diversity and limitless scope of life in the cosmos. So how does intelligent life in the universe actually manifest? While keeping the above concepts in mind, let's review this diversity of life and how we our inner and outer senses may perceive them.

CATEGORIES OF INTELLIGENT LIFE FORMS BIOLOGICAL: TYPES

Humans – Intelligent, higher life form existing initially in a biological body and native to earth.

Extraterrestrial Life Forms – Intelligent, higher life forms existing initially in a biological body and native to various planets other than earth.

Planetary Life Forms – Non-anthropomorphic intelligent beings identified with an entire planetary body; for example, the earth as Gaia. Other planetary, solar and galactic bodies are thought to be individual conscious organisms as well.

Other Biological Life Forms – On earth, cetaceans are highly intelligent yet non-human; theoretically, other planets may possess corollaries. BIOLOGICAL:

MANIFESTATIONS/PRESENTATIONS (This listing describes how biological intelligent life forms may present or be perceived by both inner and outer senses)

Physically – In physical bodily form, with or without spacecraft

Technologically – Via radio, TV, and advanced ET technology involving technological interface with mind/thought

Mentally – Via telepathy, lucid dreams, or other direct mind interface

Astral Body Projection – The presentation of a human, ET or other biological life form in its subtle, non-biological component, which may be perceived by another biological life form in waking or dream state.

Causal or Thought Body Presentation – The perception of another biological thought form in its most subtle individual aspect, the thought essence ‘body’, which may be projected without either biological or astral body components.

Pure Mind/One Mind – The ultimate state of oneness. Any and every conscious life form is essential non-local, pure unbounded mind and may be so perceived.

TYPES OF EXPERIENCES AND ABILITIES OF BIOLOGICAL LIFE FORMS:

Physical Senses – Sight, Hearing, Smell, Touch, Taste

Physical Capabilities – Movement/motion, etc.with/without technology

Mental Abilities (Traditional) – Thought, ideation, creativity, visualization, memory, sensory perception and recognition, others. Non-Local Mental Abilities (Non-Traditional) – These involve recognition and utilization of the non-local aspects of both mind and matter:

Telepathy – The ability to send and/or receive thought from one being to another.

Precognition – The ability of any intelligent higher life form capable of being aware of awareness to access via non-local mind probable events of the future.

‘Postcognition’ – The ability to perceive via non-local mind distant past events not personally experienced by the perceiver. Non-local mind can access past as well as future points in the time/space linear continuum.

Remote Viewing (or Remote Sensing) – Here defined as the ability to see via non-local, unbounded mind distant events in space, either in real time or in the past or future.

Dream State Abilities – The ability, while in the dream state, to experience precognitive dreams, postcognitive dreams, remote viewing and lucid dreaming.

Celestial Perception – The ability to perceive aspects of physicobjects.

Telekinesis – The ability to move an object through observable space via interface between subtle, non-local mind and a comparable aspect of an object.

Teleportation – The ability to move or manifest an object a substantial distance via non-local mind and the non-local aspect of matter, which negates the linear aspect of space.

Transmutation (Non-Technological) – The ability to convert one material object to a different element or object using the subtle interface of mind and non-local matter.

Bilocation – The ability to manifest a body or object in two or more points simultaneously in the time/space continuum. (Example – Appearing and perceiving in two or more places at the same time.) Related ability – Bi-timing – the ability to appear in the same space in more than one point in time (so- called time travel).

Materialization/Dematerialization (Non-Technological) – The ability of a life form to make manifest or unmanifest a material object using mind/matter interface.

Out-of-Body Experience/Astral Projection – The ability to project at will the subtle astral or light body, to a point in time and space outside the biological body.

Near-Death Experience – The transient separation of the subtle or astral body from the physical biological body due to bodily illness or injury. May involve perception of the so-called next world or subtle aspects of the cosmos, usually astral but advanced perceptions may involve causal or pure thought realm.

We have been briefed by trusted members of the military regarding “non-lethal defense” and related fields. They have confirmed to us that psychoelectronic technologies exist, off-the-shelf, which can target an individual or group and remotely make them have a personal conversation with their personal God. And they would so believe it was real, they would pass a lie detector test.

Quoting from a sensitive memo FedEx'ed to my home from Mr. Petersen, who made all of the arrangements with the CIA Director:

“I talked to Woolsey this morning and he (underlined in the original) suggested getting together over dinner. He was not aware of your organization or that anyone was planning such an announcement {regarding UFOs}. This almost certainly means that,

there is an active attempt being made at lower levels of government to sabotage Project Starlight {the CSETI UFO disclosure effort},
this group almost certainly has tapped your phones and is aware of most of the details of your plans...”

“If we do have dinner with Jim (Woolsey), we will have moved this whole thing to a much, much higher plane and in doing so raised significant red flags for those who don't want to see this succeed. Operation Starlight will become a serious (underlined) threat to the status quo.”

“Meetings with people like Woolsey must be kept very closely guarded. I have not even told Diane {Mr. Petersen’s wife/msg} about it.”

“You must understand that great principalities and powers will oppose your plans...”

Then, all in bold: “Remember: the most powerful people in the world will have a deep, compelling interest in our activities and will use everything (in italics) at their disposal to effect their objectives.”
